RHEVERSON URBICHE

IT Analyst — Data, SAP Business One and applied AI

SUMMARY

IT analyst at an LED panel manufacturer, promoted from sales for my work on integration and BI. I administer SAP Business One and build Power BI dashboards, an SAP-integrated operations portal and an SAP HANA → Databricks pipeline with an audited purchase-propensity model. In parallel, I build my own digital products with payments, apps and AI. Data Science student.

EXPERIENCE

IT Analyst — Sigpel — Indústria de Painéis de LED — 2024 — present

- Administer and support SAP Business One processes, with SQL queries and reports for decision-making.
- Power BI dashboards and KPIs (Power Query, modeling and DAX) for management and leadership.
- Internal operations portal integrated with SAP B1: 18 apps, reads from HANA and writes through the Service Layer.
- SAP HANA → Databricks pipeline and a purchase-propensity model with a leakage audit.
- Internal controls and automation of manual routines, based on requirements gathered with each department.

Sales Assistant — Sigpel — Indústria de Painéis de LED — 2023 — 2024

- Tracked orders and supervised SAP integration across sales, purchasing, production and inventory.
- Built BI reports integrated with SAP for leadership monitoring.

Independent developer — Own and client projects — 2025 — present

- PlanejeApp: AI personal finance, Android and iOS apps and subscriptions.
- TudoParaEventos: event-supplier marketplace with AI agents.
- Kluska: own e-commerce with Pix, shipping and a lightweight ERP.
- WordPress site for a publisher, with tested releases and automatic rollback.

Tax Assistant — Makita do Brasil — 2020 — 2021

- Reviewed and posted taxes (PIS, COFINS, ICMS and others), ensuring tax and accounting compliance.

Administrative Assistant — Makita do Brasil — 2019 — 2020

- Accounts payable in Excel, bank reconciliation and invoice management in TOTVS.

SELECTED PROJECTS

Propensão de compra — From SAP HANA to a lakehouse and a weekly queue of the customers most likely to buy.

Portal de operações — A Django portal on top of SAP Business One that moved routines out of the ERP and saved R$ 20,160 in licenses.

PlanejeApp — Personal finance app with an AI assistant, Android and iOS apps, subscriptions and a WhatsApp bot.

TudoParaEventos — A marketplace connecting event planners with suppliers, with paid plans and AI agents.

Kluska — A tie and groomsmen-kit store with Pix payments, live shipping quotes and a custom lightweight ERP.

LucroRadar AI — BI with an AI copilot that separates revenue, margin and cash to explain why money isn't left over.
